

ITC DATA CORP. Leverages InSpeed Networks to Provide Quality Services

*A Simple Yet Powerful
SD WAN Solution*

NEWBURGH – September 27, 2018 - InSpeed Networks™ the leading provider of self-driving SDWAN solutions and ITC, a leading managed technology services provider, today announced that ITC has selected InSpeed Networks to help them provide unified connectivity, improved network performance, security and real-time visibility.

The InSpeed Cloud based platform provides ITC's customers with the ability to confidentially implement Voice and Video solutions over commodity Internet connections. Voice, Video and Virtual Desktop Infrastructure solutions work every time, all the time. InSpeed solves five common problems that we see businesses deal with every day: quality of service, visibility, business continuity, security and deployment and management challenges.

“Our customers are looking for advanced, secure communications over inexpensive commodity internet connections, that can be quickly deployed, and easily maintained, which made InSpeed's cloud platform the obvious choice for us,” said Keith Studt, President. “Unlike competing solutions that require constant maintenance and, in the end only frustrate the customer, InSpeed, delivers an enterprise ready SDWAN solution designed to support companies of all sizes with an elegant approach to solving a complex network issue.”

“We are delighted to enhance their Unified Communications offerings with InSpeed's self-driving service,” said Charles Krogman, Vice President of InSpeed Networks. “With InSpeed Quality Service (IQS), we deliver on the promise and vision of SDWAN without the complication of managing it. Why not let it run itself?”

Key Takeaways:

- ITC is a leading technology firm that has chosen the InSpeed cloud service to deliver best-in-class SD-WAN services to its large customer base throughout the country.
- ITC selected InSpeed Networks because their solution solves five common problems that their customers deal with every day: quality of service, visibility, business continuity, security and deployment and management challenges.
- InSpeed Networks, which creates the ability to reliably utilize commodity internet link for time sensitive traffic, fits perfectly with ITC mission to provide best in class Customer Satisfaction for their customers.

ABOUT ITC

ITC (ITC) is a Managed Technology Services Provider (MTSP) that focuses on commercial clients including businesses, municipalities and schools. By “leveraging technology and putting it to work

for you”, ITC increases our clients' profitability through efficiencies and provides them with a competitive advantage in their marketplace.

Founded in 1989, ITC provides a broad range of technology solutions including: Access control, managed IT services, situational awareness, structured cabling, unified communications, video surveillance and wireless networking using Cloud and premise based always-on technology. For more information about ITC, please call (845) 561-4440 or visit www.itc-communications.com

ABOUT INSPEED NETWORKS

InSpeed provides businesses with the ability to simply install a service that Streamlines™ their commodity internet connections for crystal clear voice, artifact free video, and responsive virtual desktop sessions. InSpeed's Streamlining™ technology is self-adjusting and simple to install. Now customers can utilize commodity Internet to access critical cloud services, and safely move away from expensive fixed circuits without the risk of poor quality voice, video and virtual desktop sessions. Headquartered in Palo Alto, California, InSpeed offers its cloud service to its Channel Partners in the US and Canada. For more information, visit inspeednetworks.com.
